- Perform diagonalization and compute the Jordan form of matrices.
- Solve first order differential equations and related models.
- Solve linear ordinary differential equations.
- Use linear algebra to solve linear systems of ordinary differential equations.

Grading Policy:

Exam I Common Exam (Written)	Date: September 30	Place: TBA	25% (75 Points)
	Time: TBA	Material: 1.1 – 3.6	
Exam II Common Exam (Written)	Date: November 4	Place: TBA	25% (75 Points)
	Time: TBA	Material: 4.1 – 7.2	
Final Exam Common Exam Comprehensive	Date: TBA	Place: TBA	35% (105 Points)
	Time: TBA	Material: Comprehensive	
Class Work	Class Activities: It is based on HW, quizzes, class tests, or other class activities determined by the instructor. Any quiz or test under class activity should be of written type. The average x (out of 45) of class activities of the sections taught by the same instructor should be in the interval $[31.5, 33.75]$.		15% (45 Points)

Grading Method: Curved grading system will be applied.

Exam Questions: Questions of the common exams are based on examples, homework problems and exercises in the text book.

Missing Exam I or Exam II: No makeup exam will be given under any circumstance. In case, a student misses Exam I or Exam II for a legitimate reason (such as medical emergencies), his grade for this exam will be determined based on the existing formula which depends on his performance in the non-missing exam and in the final exam.

Attendance: Attendance is a University Requirement (see p. 38 of the Undergraduate Bulletin 2006-2009). A DN grade will be awarded to any student who accumulates 09 unexcused absences.

Academic Integrity: All KFUPM policies regarding ethics apply to this course.
